OTHER SOCIAL BOOKMARKS - EXPOSE THE TRUTH WORLDWIDE:

On September 11, 2001, the United States experienced the most significant and violent attack by terrorists even on its own soil. The terrible events that ensued have been linked to the mastermind of Osama Binladin, the leader of the group Al-Qaeda.

Although the Binladin family group denounced their fallen son and any political

affiliation of Al-Qaeda, on the same day as the terrorist attacks, the Binladin family website and all of their web pages, links, emails and domain name EXPIRED -- on September 11, 2001.

Shocked and curious about the possible connection between Binladin and the war on America, I, **Christopher Curry, a technology consultant, began to investigate these events via the net.**

I found a number of websites linked to Osama Binladin and began to notice some startling parallels: the largest and most unbelievable was the expiration of a website owned by the Binladin family: [www.saudi-binladin-group.com](http://www.saudi-binladin-group.com).

### An Interesting Point to Consider POINT TO PONDER #1

I have often been asked about the proof and validity of this domain expiry and the former owner (BINLADIN ITSELF). I SUGGEST You [query ARCHIVE.ORG](#) - what is most remarkable about visiting [ARCHIVE.ORG](#) demonstrates that this name was registered PRIOR TO SEPTEMBER 1, 2000 - MEANING that the potential for it simply being a lapse in a one-year expiration [\(of a \\$35 fee\) is reduced](#) because the name was registered [TO BINLADIN prior to September 1, 2000](#). NOTICE THE NAME WAS REGISTERED PRIOR TO MAY 20, 2000 - another strange coincidence. It is possible to cancel and expire domain names PRIOR TO THEIR ANNUAL DUE DATE. Moreover, why wouldn't a wealthy family simply pay (at most) a \$35 annual fee to renew their chief corporation domain name? And, yes - [it is possible to cancel a domain name](#) even before it's own expiration date.

You decide for yourself ... the truth is out there ...
